

Acme Capital Partners - Board Risk Committee Minutes

Classification: Internal. Prepared for distribution to Board members, Executive Committee, and Internal Audit.

Meeting date: 2026-06-24

Location: Boston head office and video conference

Chair: Helena Vosburgh, Independent Director

Present: Marianne Alvarez (CEO), David Okonkwo (CFO),

Priya Raghunathan (CCO), Samuel Whitfield (Head of Risk Technology)

1. Q2 FY2026 Financial Review

The CFO presented Q2 FY2026 results: total revenue of \$171.2 million and net income of \$39.1 million. The Committee noted the one-time \$3.8 million London office consolidation charge and asked that it be disclosed separately in the Q3 management reporting pack.

2. Incident INC-2026-0412

The Head of Risk Technology reported on the 2026-04-12 delay in automated transaction monitoring alerts. Alerts were delayed by an average of 6.5 hours; 31 alerts reached Compliance later than the internal 4-hour target. No regulatory deadline was breached. The Committee accepted the root cause finding - a schema migration deployed without a supporting index - and directed that a pre-deployment migration review gate be added. Owner: Head of Risk Technology. Due 2026-08-31.

3. Compliance Operations Capacity

The Committee revisited the Q1 FY2026 risk note that alert volume grew 34% year over year against unchanged Compliance operations headcount. The CCO requested four additional analysts. The Committee approved two positions effective Q3 and deferred the remaining two pending an automation review.

4. Vendor Concentration

The Committee reviewed assessment VRA-2026-0031 covering Northwind Data Services. It noted the vendor's 8-hour recovery objective against Acme's 4-hour tolerance for monitoring-critical feeds, and asked management to report on a failover data source at the September meeting.

5. Escalations

The CCO advised the Committee of one open restricted matter reviewed under privilege. No detail was minuted. The matter remains with outside counsel.
